FEATURED PROJECTS

1. HIUNXSTAR — Cinema Booking & Management System

Stack: PHP MVC, MS SQL Server, JavaScript, HTML5/CSS3

- Designed a fully normalized 3NF relational database schema handling complex multi-theater relationships.
- Implemented ACID-compliant booking transaction controllers with real-time seat locking mechanism to eliminate race conditions.
- Engineered custom administrative dashboard for revenue analytics and screen scheduling.

2. VETERINARY CLINIC MANAGEMENT & EHR PLATFORM

Stack: Django, Python, MySQL, Redis, Celery, Docker Compose

- Built a containerized microservices architecture with asynchronous task queues for automated appointment reminders.
- Developed secure Electronic Health Record (EHR) modules ensuring accurate diagnostic history tracking.
- Optimized database queries and Redis caching layers for sub-second page response times.
